

LAMENESS LEADS TO LOSS OF PRODUCTION

We know that the most profitable lamb you sell off the farm will be sold directly off its mother or secondly off grass. To achieve a higher percentage of this within your flock, it is crucial that you keep **ALL** your sheep sound of foot. To this end MVT (Scotland) Ltd have developed a range of products, which can adapt to all situations whether it be hill or in byre flocks.

Healthy Hoof FB is based on organic acids, zinc and copper sulphate and a special cleaning detergent. By using this product at the various recommendations you should firstly be able to get on top of the problem and then thereafter contain it. This can also be used in a spray for spot treatment of individual animals.

comes in a 5lt container

Healthy Hoof Foot Gel

This product is the identical formulation to the above footbath. The only difference is that it is based in a gel format. It is perfect for individual animal treatment and can be used as many times as required. It is small enough to be carried on the bike or in the medicine box in the Landrover. Easy to apply and gives you that extra control.

comes in a 500ml tub

Specialist Minerals, Vitamins and Trace Elements

GPS Spray

This iodine-based spray is very good at suppressing fungal and bacterial infections on soft, moist tissue. It will dry the infected area and will keep out further infection. Can be used regularly and can also be carried on the bike or in the Landrover. Ideal for individual use.

comes in a 1lt bottle with sprayer

Hoof Flourish

Sometimes when the foot problem goes too far and we have not only soft outer hoof tissue, but also a soft inner sole, we need to tackle the problem in a different way. Used as an oral drench Hoof Flourish works from the inside out. With high levels of zinc and biotin we can target the problem area.

comes in 1lt and 2.5lt containers

Just because the rest of the flock are not lame, doesn't mean to say that they don't need a boost. To keep your lambs and ewes in top working order use regularly.

**Sheep Flourish – with or without copper
